Josh Young

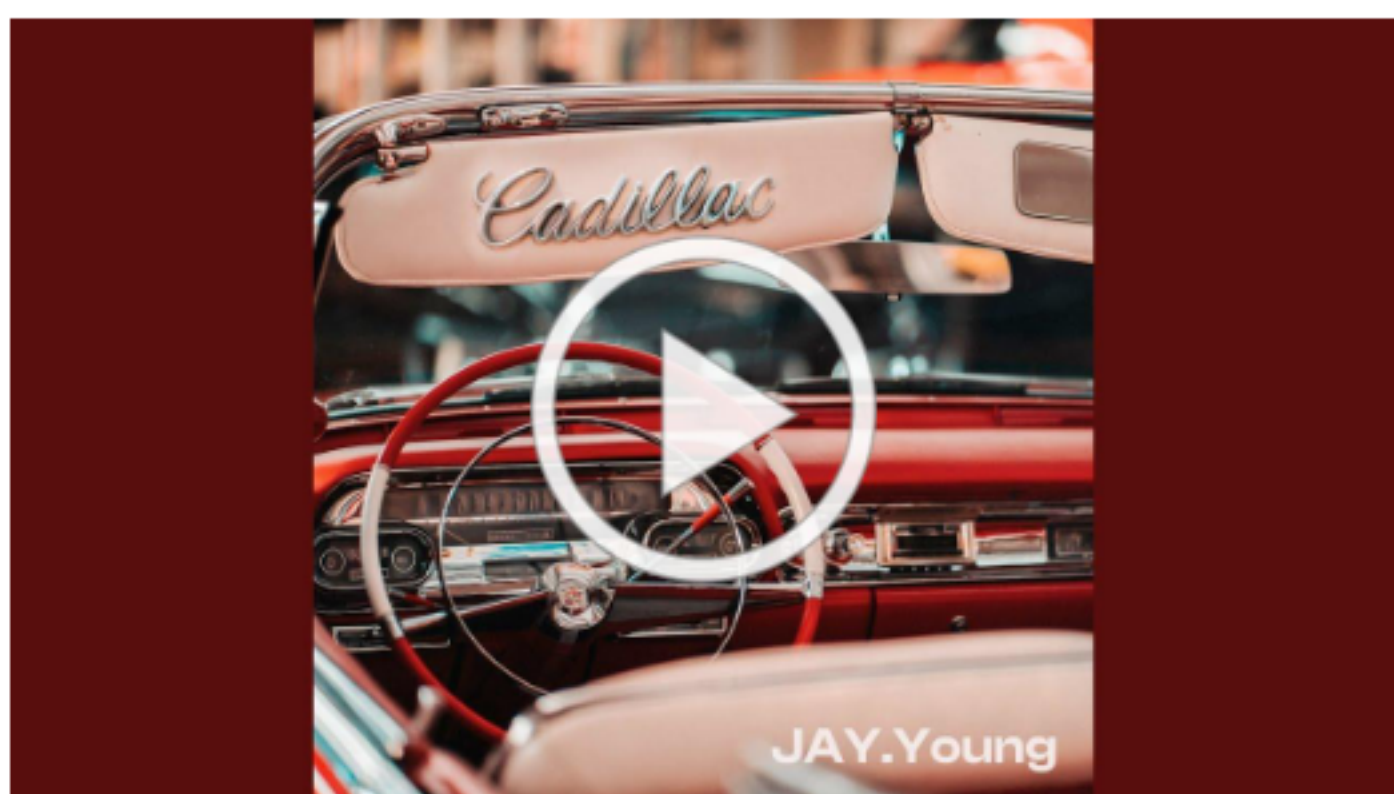

Hot off the press comes the debut "OXYGEN" single from Jamaican Recording Artist J. YOUNG! Fusing the old school with a love for reggae melodies, "OXYGEN" rocks that perfect blend of classic live instrumentation and modern synths to make an infectious summer anthem for 2015.

The Music Video filmed on the island paradise of Boracay, Philippines in June 2015, and features Asian stars Roxy Barcelo and Ashley Rivera.

This EP has something for all tastes and is sure to offer you the tropical experience you've been craving... but there's ONE PARTICULAR STANDOUT TRACK that really gets our motors running. That track, of course, is Cadillac.

This is an easygoing synth poppy track with the funky guitars we've all come to expect from J. Young. This track stood out so much that it's now a standalone single, not just a track among many on Three Sixty!
